ABOUT ME

I am enthusiastic about WordPress and IT in general, and since my first introduction to HTML and CSS, I have discovered that this is something I am good at and can thrive in. I finished IT Bootcamp's extensive WordPress course, where I learned how to create well-designed, responsive websites, troubleshoot issues, monitor, and improve website performance. I'm also self-taught in marketing and SEO, so I know a few tricks when it comes to boosting website visibility on Google.
